

Follow Spots

F 7R

DESCRIPTION

Sti's F Series's high powered, affordable followspot uses a super bright 7R and 15R lamps and a new, specially designed reflector to produce more output as a 2,000W lamp. By giving you the same output and brightness with lower power consumption, you be rest easy knowing that this spot light will run cooler and cost less over time. This unit is housed in an extruded aluminum casing and ships with an included hanging bracket. Built to the same exacting specifications as all STI products, you can count on this followspots to be solidly built, durable, and long lasting through numerous events. The F series from STI are made in line with the new Iris design and includes a blackout feature to cut off light output when needed. When you need to literally put someone in the spotlight, the F series from STI are really shines. Lower power and higher output than most competitors, this affordable, professional quality followspot is a clear winner.
