Power Amplifiers

DESCRIPTION

Sti's FA Series power amplifiers are designed for permanent installation applications, to provide background or live music in venue including bars, mosques, restaurants, sports facilities, and performing arts centers.

FA Series power amplifiers also feature an exciting new industrial design. Equipped with an extremely robust power supply and a powerful, linear amp design, flawless operation is guaranteed – even in the most demanding environments. A sophisticated protection circuitry ensures safe, reliable operation under all conditions. Six different models per series are available, with a total output power ranging from 530 W to 3000 W at 4 ohms per channel.

Like all Sti amplifiers, the FA Series also offers high quality components and truly professional processing power and performance characteristics. Their engineering and applied technologies enable exceptional sound quality with plenty of headroom.

Frequency Responce	20-30000 Hz +0/-0,3dB
Damping Factor	>300 4 Ω
S/N Ratio	100dB
Stereo Power	2x1500W
Weight	30kg
Size	2U 19"

- Stereo, Bridge and Parallel Button
- Selectable Low-cut for Each Channel for Subwoofer Support.
- Bridge Connection Support.
- Male 6,3" Connector, XLR and Spekon soke
