

Z 15A

DATASHEET

Two Way Plastic Cabinet Active Professional Speaker

DESCRIPTION

Designed and tuned in the Turkey, StI Professional's Z15A boasts an all-new 1600-watt peak (800-watt continuous) amplifier, a significant advance over the 1550-watt peak (750-watt continuous) amplifiers in its Z15 Series predecessor. With a reimagined 15-inch low-frequency driver fused with a new 2-inch horn-loaded high-frequency driver with a precision waveguide, Z15A has been painstakingly designed to play louder, handle more power and produce a level of clarity at higher SPLs that defies belief. With an extended-range frequency response and exceptional heat dissipation for impressive power-handling, plus thermal and transducer overdrive protection, Z15A guarantees to withstand the rigours of the road and secures your peace-of-mind, even at all-night-long concert levels.

Crossover Frequency	55Hz-18kHz
Impedance	8 Ohms
Dispersion	H90°xV40°
RMS	800W
Peak Power	1600W/5Min
Sensitivity	99 dB (2,83v/m)
Maximum SPL	128 dB
Connections	Bluetooth - USB MP3
Woofer	15"x1(380mm)
Tweeter	2"x1 (50mm)
Voltage	220V 50-60 HZ,
Size (HxWxD)	686x445x406mm
Weight	24kg
